

MARATHON C/TEMP

MARATHON C/TEMP THE WORLD TRAVELER 60 DAYS SINGLE USE TEMPERATURE RECORDER

c/TEMP is the revolutionary single use pre programmed electronic temperature data loggers. Designed for measuring temperatures during the transportation, the internal thermistor accurately records time and temperatures for user selectable readings in Celsius, Fahrenheit and Kelvin. Because of its small size (13 cm x 7 cm x 2 cm) it is suitable for applications where space limitations exist. The internal software provides the following feature:
 Time mechanism, start time, intervals, end description for special instructions, alarm values, recording status, measurements date, software version, serial and tracking number, model type and after the fact report generation options.
 User selectable features also include language conversions on the fly from English to Spanish, Portuguese, Japanese, French and German.
 It is easy to use as software provides clear graphs: data can be exported to any spreadsheet or database program for later analysis. To start the recorder, simply press the start button

Run time:	60 days – Celsius and Fahrenheit on same scale.
Temperature range:	-29 Celsius to +72 Celsius (-20F to +160 Fahrenheit)
Temperature Accuracy:	Plus/minus 2 Celsius
Temperature Sensor::	Precision Thermistor NIST Traceable.
Memory EPROM:	8K storage
Measurement Interval:	11 mins 16 sec
Computer interface:	Serial port RS232 Serial Cable
Indicators:	Two: Start/Stop and alarm
High and low alarms limits	LED indicator alarm set by temperature and time.
Power Source:	3.0V Lithium Battery (1 year Shelf life)
Minimum delivery:	1 carton with 20 pieces, 1 plug for PC + software CD
Dimensions:	35,56 CM x 15,24 CM x 12CM, 0,006503 Cbm

The Marathon c/temp is available in Windows 3.1 and Windows 95, 98, 2000, XP and NT.

Security seals – a small important detail in shipping - provided by OneSeal an ISO 9001 certified company.
